

AKFST-10

FRONT SIGHT
ELEVATION TOOL
FOR THE MINI-BERYL

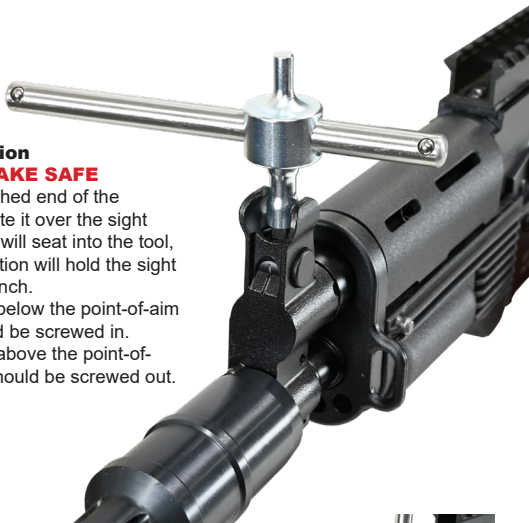

MAGNA-MATIC®
DEFENSE

Adjustment of Elevation

1. UNLOAD AND MAKE SAFE

2. Use the narrow notched end of the AKFST-10, and locate it over the sight post. The sight post will seat into the tool, and the notched portion will hold the sight post base like a wrench.
3. If point-of-impact is below the point-of-aim the sight post should be screwed in.
4. If point-of-impact is above the point-of-aim the sight post should be screwed out.

The peg end of the tool is designed to help you push pins out of an AK type rifle.

The AKFST-10 Elevation Tool is specifically designed for use with Mini-Beryl AK type rifle. The peg on the other end of the tool is for pushing pins out in any AK rifle.
